

# Worksheet - Classroom Waste Tally

**Note: If you are using buckets, make sure you weigh the buckets before you start and subtract the bucket's weight from the total weight for each category.**

<b><i>Weight of Garbage Before Audit</i></b>	<b>Weights of Separated Garbage</b>			
	Cardboard	Compostables	Drink Containers	Metal
	Paper	Plastic	Reusable	Residual Waste

If you already have recycling and compost bins, write down any items you found in these bins that shouldn't have been there:

What did you find that is reusable?

What did you find that can be composted?

How can we further reduce the "residual waste?"
